6. Managing Projects — Admin
7. Project Health Check
8. Team Performance
9. Clients — Admin
10. Completed Projects

SECTION 01

First-Time Login & Permissions

A one-time setup step. Once done, you will never see this screen again.

■■ The "Unverified" warning is completely normal. Google shows this for all internal tools that have not been submitted for public verification. Your data is safe — this is your own company's tool built on Google Apps Script.

The Google permission popup — click Review Permissions to continue

Follow these steps the first time you open the app:

1

Open the app

Navigate to `sip-todo.netlify.app` in Chrome.

2

Click "Review Permissions"

A Google Apps Script popup appears. Click the blue Review Permissions button.

3

Select your Google account

Choose the work email your admin registered for you — not a personal account.

4

Click "Advanced" (small grey text, bottom-left)

On the "Google hasn't verified this app" screen, look for the small Advanced link.

5

Click "Go to SI_FINAL (unsafe)" → then Allow

This grants the app the permissions it needs. You are now signed in permanently.

■ If the popup keeps reappearing, check that you are using the correct Google account — the one your admin registered for you.

SECTION 02

Dashboard

Your at-a-glance overview of all projects, tasks and recent activity.

Dashboard — KPI cards, charts and recent activity feed

The five KPI cards across the top summarise the current state of all work:

KPI	What it means
Active Projects	Total projects currently in progress
Total Tasks	All tasks across every project
Pending Tasks	Tasks with status "In Progress"
Overdue Tasks	Tasks past their due date, not yet completed
Awaiting Approval	Tasks marked Completed but not yet reviewed by the Team Lead

The three charts below the KPIs show task status breakdown, project health (active vs completed), and your client portfolio split. The Recent Projects and Recent Tasks panels at the bottom give a quick view of the latest activity across the team.

SECTION 03

Projects & Tasks

Your main working view — all active projects and their tasks, grouped by client.

Projects & Tasks — projects grouped by client, with tasks listed underneath

Each project card shows the project name, status badge (Active / On Hold), manager, Team Lead, team members, deadline and a task completion progress bar. Tasks are listed below with assignee, due date, status and priority.

Task action buttons

Each task row has action buttons on the right side:

Button	Who can use	What it does
■ Complete	Assigned member, TL, Admin	Instantly marks task as Completed and sends for Team Lead review
—■ Edit	Assigned member, TL, Admin	Opens edit modal — change name, date, status, priority, notes
■ Reassign	TL, Admin	Transfer the task to a different team member
■■ Approve	Team Lead, Admin	Opens approval panel — visible only on Pending Review tasks
■■ Delete	Admin only	Permanently removes the task

SECTION 04

Editing a Task

Update task details, status, notes and file attachments.

Edit Task modal — all fields available to Team Leads and Admins

Click the  pencil icon on any task row to open the Edit Task panel. What you can edit depends on your role:

Field	Who can edit	Notes
Task Name	TL / Admin	Required field
Assigned To	TL / Admin	Searchable dropdown of all team members
Due Date	TL / Admin	Target completion date
Priority	TL / Admin	Low / Medium / High
Status	Everyone	Set to Completed when the work is done
Task Approver	TL / Admin	Override the default project lead for this task only
Notes	Everyone	Add context, blockers or instructions
Attachments	Everyone	Upload files up to 5 MB — stored in Google Drive

■ Staff members (non-leads) only see the Status and Notes fields when editing. The full edit form with all fields is shown to Team Leads and Admins only.

SECTION 05

Approving Tasks

For Team Leads — review completed work before it is marked officially done.

Review Task Completion panel — choose Approve or Reject and add optional feedback

When a team member marks a task as Completed, it enters "Pending Review" state. The Team Lead (or designated approver) sees a ■■ gavel button appear on that task row.

How to approve or reject a task

1

Find tasks with the "Pending Review" badge

Look for the amber Pending Review label on task names in the Projects page.

2

Click the ■■ Approve button

The gavel icon on the right side of the task row opens the Review Task Completion panel.

3

Choose Approve or Reject

Approve = task is fully done (green Approved badge). Reject = sends it back to In Progress for rework.

4

Add Feedback / Remarks (recommended when rejecting)

Your remark appears highlighted in red on the task card so the team member knows exactly what to fix.

5

Click Submit Decision

The status updates instantly for the whole team — no page refresh needed.

- ■ Only the project's Team Lead, the designated task approver, or an Admin can see and use the approval button. Regular staff members do not see it.

SECTION 06

Managing Projects

Admin only — create, edit, pause and delete projects.

Edit Project modal — configure all project settings including team and dates

Click the  pencil icon on any project card header to edit it. Admins can also  pause (put On Hold) or  delete a project from the same row of action buttons.

Field	Description
Project Name	Display name shown throughout the app
Client	Linked client from your Clients list
Client Type	Category tag for portfolio reporting
Start Date	Project start — used for velocity calculations in Health Check
Deadline	Target delivery date — drives RAG status and overdue flags
Project Manager	Internal owner — must have Admin or Team Leader role
Project Lead	Approves tasks at first stage (default approver for all tasks)
Status	Active / On Hold
Staff Members	All team members on this project — searchable multi-select

- Setting a Start Date and Deadline unlocks velocity tracking and the expected progress indicator on the Health Check page.

SECTION 07

Project Health Check

RAG status at a glance — Red, Amber, Green for every active project.

Health Check — project cards colour-coded by RAG status

Status	Colour	When it appears
Critical	■ Red	One or more tasks overdue, OR project deadline has passed
At Risk	■ Amber	Tasks awaiting approval, OR deadline within 7 days with unapproved tasks
On Track	■ Green	All tasks on schedule, nothing overdue
On Hold	■ Grey	Project is paused — no action required

Each project card also shows:

- **Task Completion bar** — actual % done vs expected % based on elapsed timeline.
- **Expected % marker** — the black line shows where you should be today.
- **Manpower Efficiency bar** — weighted task completion based on day-effort allocated.
- **Velocity badge** — ratio of actual vs expected pace. 1.0x = exactly on track. >1.0x = ahead.
- **Deadline chip** — days remaining or overdue at a glance.

■ Click any KPI pill at the top (Critical / At Risk / On Track / On Hold) to filter the project cards below to that status group only.

SECTION 08

Team Performance

Admin / Team Lead — individual productivity metrics and workload overview.

Team Performance — per-member workload cards with task breakdowns

Each team member card shows:

Metric	Description
Total	All tasks assigned across all projects
Done	Tasks with fully Approved status
Pending	Completed but awaiting Team Lead review
Overdue	Past due date, not yet completed
In Progress	Currently active tasks
Awaiting Review	Submitted to TL for approval decision
Completion Rate	Percentage of assigned tasks fully approved
Workload Status	Available / Moderate / Busy / Overloaded

Use the **Filter** dropdown at the top to view a specific member. Toggle between **All Time**, **Last 3 Months** and **Last 6 Months** using the time range buttons.

SECTION 09

Clients

Admin only — manage your client portfolio.

CLIENT NAME	TYPE	DATE ADDED	PROJECTS	ACTIONS
P Piyush	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	1 Active	
V Vishesh Sahni	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	2 Active	
Y Yashvir, Mansi, Mayank	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	1 Active	
N Nikhil Kaushik	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	1 Active	
A Ajit, Abhishek	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	1 Active	
B Batasha	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	0	
A Alisha	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	0	
S Sid	—	Sun May 24 2026 21:36:16 GMT+0530 (India Standard Time)	0	

Clients page — full list with client type, date added and active project count

The Clients page lists all clients with their type, date added and number of linked projects. You can:

- Click **+ Add Client** (top-right) to add a new client record.
- Click **Edit** to update a client's name or type.
- Click **Delete** to remove a client (only if no projects are linked).

Clients are selected when creating a project. Keeping client names consistent ensures correct grouping across the Projects, Health Check and Team Performance pages.

SECTION 10

Completed Projects

Your delivery track record — projects where 100% of tasks are approved.

[Image: ss_completed.png]

A project moves to Completed once all its tasks are approved by the Team Lead. Each completed project card shows:

- Project name, client and manager.
- **On Time** or **Late** delivery chip.
- Completion date and task completion ratio.

■ Completed projects are archived here for reference — they no longer appear in the Projects page or Health Check.

Need help?

Contact your admin or reach out on the project WhatsApp group.
